

Petition to the House of Commons

Whereas bill C-51:

- Removes democratic oversight, bypassing elected officials to vote in laws and allow bureaucrats to adopt laws from other countries without consent;
- Removes 60-70% of all Natural Health Products from Canadian stores. Many others will be available by prescription only;
- Restricts research and development of safe and natural alternatives in favour of high risk drugs;
- Punishes Canadians with little or no opportunity for protection or recourse for simply speaking about or giving a natural product without the approval of government; and
- Allows inspectors to enter private property without consent, take your property at their discretion, dispose of your property at will, not reimburse you for your losses, seize your bank accounts, charge owners shipping and storage charges for seized property, be empowered to store your property indefinitely, and levy fines up to \$5,000,000 and/or 2 years in jail per incident.

We call upon the Government of Canada to:

- Stop bill C-51.
